Abstract of JP62091045

PURPOSE: To attain excellent and close communication confirming a face expression of other party by incorporating an antenna, a picture display panel and a television camera to a conventional multifunction telephone set.

CONSTITUTION: In addition to a telephone set including a telephone circuit, two picture display panels 31, 32, a television camera 33 opposed to the picture display panels and picking up at least the own face, an antenna 20 transmitting/ receiving a radio wave and a mobile terminal radio transmission circuit 21 coupled with the antenna and inputting/outputting a picture signal and a sound signal are provided. The antenna 20 is communicated with an antenna 50 of a fixed terminal radio transmitter 51 coupled with an exchange 60. A picture signal received by the antenna 20 is displayed on one picture display panel of the two. A picture signal from the television camera 33 is displayed on the other picture display panel and sent via the antenna 20 and the sound signal via a telephone circuit is transmitted and received by the antenna 20.
